

WS 99 SERIES

Radiographic Wallstands

Simplicity, Performance and Safety

Control-X Medical's WS 99 Series of radiographic wallstands provide the top level of quality, durability and value in hospital grade wallstands today.

The WS 99 Series of radiographic wallstands are designed to handle the rigors of the heaviest of caseloads. Accompanied with side rails and an optional tilting mechanism, the WS 99 Series of radiographic wallstands offers solutions for all diagnostic imaging needs.

RADIOGRAPHIC WALLSTANDS

CONVENIENT CONTROL

Operators can choose from either a left or right side loading direction for fingertip access. Accepts standard bucky size grid cabinets, reciprocating buckys or DR Flat Panel.

LOCKING SYSTEM

Electromagnetic brakes provide positive wallstand exposure positioning.

DUAL ROPE COUNTERBALANCING SYSTEM

Ensures maximum stability and safety for the patient and operator.

VERSATILITY

The extended track allows for examinations of tall patients as well as lower extremity. Optional tilting mechanism allows for specialized examinations.

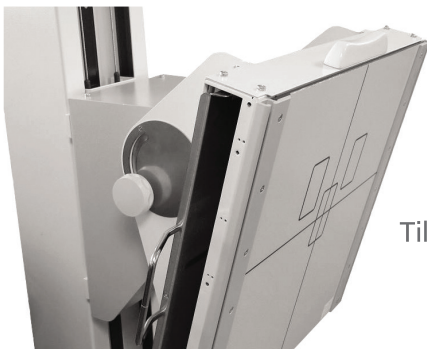

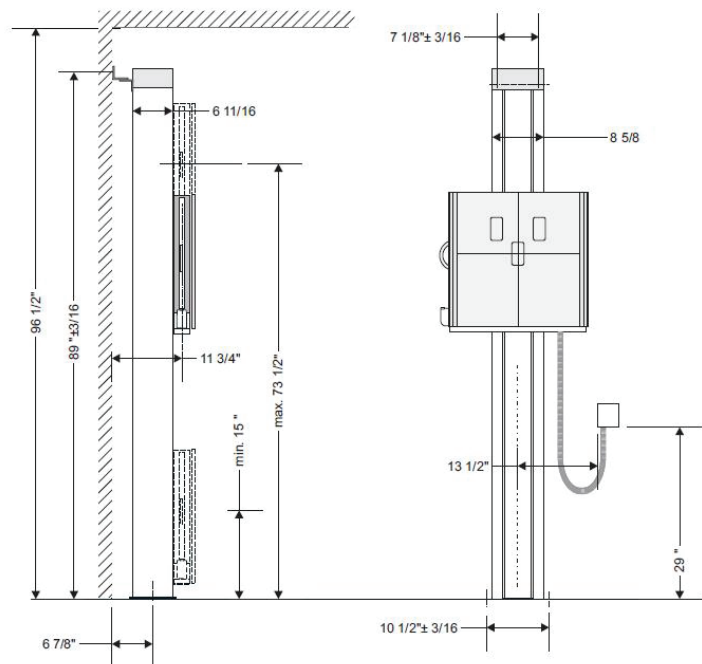

MANEUVERABILITY

Designed to provide "easy-glide" effortless movement.

DIGITAL COMPATIBILITY

Adding CR or DR is now easier than ever due to the new Bucky carriage design. Specialized mounting hardware for different digital panels is available upon request.
